

SCIENTIFIC NAME	STATUS		RANK	
COMMON NAME	N.C.	U.S.	N.C.	GLOBAL

MOLLUSKS--TERRESTRIAL GASTROPODS

<i>Mesodon subpalliatum</i> velvet covert	SC	-	S2	G? [G2] ¹
<i>Paravitrea andrewsae</i> high mountain supercoil	SC	-	S2	G? [G3] ¹
<i>Ventridens coelaxis</i> bidentate dome	SC	-	S2	G3

BUTTERFLIES

<i>Euphydryas phaeton</i> Baltimore checkerspot	SR	-	S2S3	G4
<i>Polygonia faunus</i> green comma	SR	-	S2S3	G5
<i>Satyrrium caryaevorum</i> hickory hairstreak	SR	-	S1?	G4
<i>Satyrrium edwardsii</i> Edwards' hairstreak	SR	-	S2?	G4
<i>Speyeria diana</i> Diana fritillary	SR	FSC	S3	G3

EXPLANATION OF STATUS AND RANK CODES FOR ANIMALS

N.C. Status: E = Endangered, T = Threatened, SC = Special Concern, SR = Significantly Rare. Animal statuses are determined by the N.C. Wildlife Resources Commission and the NC NHP. Endangered, Threatened, and Special Concern species are afforded some protection by state law (the Endangered and Threatened Wildlife and Wildlife Species of Special Concern act, 1987). The Significantly Rare status is a NC NHP designation indicating rarity and the need for population monitoring and possible conservation action for species not currently listed as Endangered, Threatened, or Special Concern.

U.S. Status:

E = Endangered. An animal that is in danger of extinction throughout all or a significant portion of its range.

T = Threatened. An animal that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

FSC = Federal Species of Concern. This status replaces the former "Category 2" Candidate
